EDUCATION

University of Maryland - Baltimore County, *B.S. in Information Systems* | Baltimore, MD

Sep 2022 – May 2026

- GPA: 3.836 | Relevant Coursework:** Software and Hardware Concepts, Introduction to Data Science, Programming I&II, Management of Information Systems, Java Game Development, Finite Mathematics, Applied Calculus & Statistics, Database Design, Markup and Scripting Languages

WORK EXPERIENCE

Information Technology Intern – Constellation Energy, Baltimore, MD

Jun 2025 – Aug 2025

- Built an end-to-end application development lifecycle framework by collaborating with 5+ generation business application teams, consolidating documentation from SharePoint and stakeholder interviews, streamlining knowledge access and reducing onboarding time by ~30%.
- Coordinated recovery of 10+ devices across multiple sites, streamlining shipping logistics with site managers to ensure efficient and timely asset returns to headquarters.
- Developed a remediation tracking report for lock-it security exceptions by analyzing Excel logs and building pivot tables, identifying system issues and improving visibility into 50+ vulnerabilities.

Software Engineer Intern – 4S Silversword, Baltimore, MD

Aug 2023 – May 2024

- Led development of an AI-powered assistant using Python and OpenAI API, integrating 5+ libraries (pyttsx3, SpeechRecognition, pyautogui, pygame) to enable real-time speech interaction.
- Built an Excel-based budgeting tool using VBA to automate backup of multiple spreadsheets into a centralized database, reducing manual effort by ~80%.
- Designed and implemented Excel-based project management tools (Gantt charts, burndown charts) to track progress and identify risks, improving project visibility and supporting on-time delivery across cross-functional teams.

Business Development Intern – Xeddy, Remote, USA

Sep 2023 – Aug 2024

- Automated workflows by integrating Zapier with Google Sheets, eliminating repetitive tasks and saving 120+ hours of manual work.
- Drove user acquisition by onboarding 200+ beta users across universities (Johns Hopkins, UMD, Towson, UMBC), supporting product testing and feedback collection.
- Partnered with the CEO to develop and distribute a company newsletter, improving communication of key updates and insights across stakeholders.

PROJECTS

Thrift Store Management System – Designed a structured IS database for thrift stores using SQL to track inventory, donors, suppliers, and transactions. Created an ER model in 3NF to ensure data integrity and seamless inventory flow.

2-D Java Processing Game – Designed and programmed an interactive life simulation game that allows players to step into the shoes of the main character. Implemented decision-based mechanics where choices impact the storyline. At the end of the semester, we presented our game to the class and to be judged by the professor.

Secure Credentials Manager – Implemented encryption features to enhance security such as regenerate keys, emails, password entities. Designed a user-friendly GUI using SceneBuilder for seamless interaction and functionality.

Wireless Network & Penetration Testing – Conducted penetration testing on wireless networks at my home using Kali Linux and Aircrack-NG, identifying security vulnerabilities in WEP, WPA, and WPA2 encryption. Executed deauthentication attacks, packet sniffing, and MAC address spoofing to assess network security and potential exploits.

Man-in-the-Middle (MITM) Attack Simulation – Implemented ARP Spoofing attacks using BetterCAP to intercept and manipulate network traffic between clients and routers. Developed custom spoofing scripts to automate MITM attack execution and data

AWARDS/CERTIFICATIONS

Professional Boomi Integration and Essentials

Jul 2025

Dean's List/President's List

2024-2025

CCNA: Enterprise Networking Security Automation

June 2021

SWRE: Switching, Routing, and Wireless Essentials

Feb 2021

Cisco Certified Technician

SKILLS: Python • Java • C++ • Linux • Windows • GIT • Excel • Markup • VMWare • GIT • Networks • SQL • Zapier • Film Production & Editing • Project Management • Communication • Multitasking • Agile • Problem Solving • Risk Assessment • Team Leadership
